PART 1

YOUR NEXT GENTLE STEP

Based on what you shared, many people choose to start by:

Talk with your family about screening

Sharing health information strengthens family care. Take a moment today to talk about screening together.

PART 2

SCREENING KEY FACT

Here is what you might be interested:

Cedars-Sinai strongly encourages regular colorectal cancer screening **starting at age 45**, because early detection makes treatment much more **effective**. Regular screening (like colonoscopy or stool tests) helps **find cancers early**, when they are easier to treat and cure.
